© 2026 Roessling Digital Solutions LLC. All Rights Reserved.

Founded in 2025, Roessling Digital Solutions LLC brings 20+ years of technical leadership in Enterprise IT and Aerospace & Defense Programs — program management and mission-focused technical delivery from vision through sustainment. RDS is an **AI-Native** organization. On-premise CMMC L1 (FCI) and Azure GCC High CMMC L2 (CUI) enclaves enable handling of government sensitive information; **ITAR-Ready** posture awaiting first ITAR-covered engagement.

Identifier	Detail
Legal Name	Roessling Digital Solutions LLC
UEI	J56WX2RQ7UU8
CAGE Code	156J8
NAICS	541512 (primary), 541511, 541519, 541715, 541330, 541611, 513210, 611420, 611430
PSC	AC11, AC12, AC13, AC32, AJ11, AJ12, AJ13, AJ14, AJ15, AK14, AR13, B505, B513, B537, B538, B544, DA01, DA10, DB02, DC01, DD01, DF01, DF10, DG01, DH01, DJ01, DJ10, H270, R408, R425, R499, R612, R799, U002, U012, U099, 7A20, 7A21, 7D20, 7F20, 7J20
Business Type	Veteran-Owned Small Business (VOSB), SBA Certified VOSB
Address	34 NH Route 111, Suite 205, Derry, NH 03038
Principal POC	Wayne Roessling — (603) 458-8436 — wayne.roessling@roesslingdigital.com

## Core Competencies

**Program Leadership & Execution:** Provides program leadership accountable for cost, schedule, and risk — EVM (ANSI/EIA-748), Integrated Master Schedules, CDRL deliverables, subcontractor coordination, agile cadences (SAFe, Agile), and major program reviews (SRR, PDR, CDR, TRR). Oversees portfolio and requirements management (IEEE 29148).

**Technology & Engineering:** Delivers full-lifecycle technology and engineering across two customer areas. For IT modernization, supports business architecture through sustainment using TOGAF, BPMN, UML, DevSecOps, and ITIL. For defense programs, supports mission analysis through fielding using UAF, DoDAF, SysML v2, MBSE, and system-of-systems engineering. Develops custom software, services, and data integrations; unique depth in formal ontologies and Human-AI collaboration with Ph.D.s on staff.

**Operations & Sustainment:** Operational support, transition-in services, and structured knowledge transfer. Scales through subcontractors, mentor-protégé partners, and direct hire. Coordinates multi-team execution with status, performance metrics, and program-office reporting. **RDS-built** Government Property Management System (FAR 52.245-1, FAR Part 45, DFARS 252.245-7001 through -7004) PMSA-ready.

**Security & Compliance:** CMMC L2 C3PAO-assessed Azure GCC High; **ITAR-Ready** (22 CFR 120-130). DCAA-ready financial systems; SF 1408 criteria self-assessed. RMF-aligned (NIST SP 800-37/-53); SSP both enclaves; ATO evidence packages available. SSDF (NIST SP 800-218): CISA Common Form attestation-ready; required SAST/SCA/container-scan + NDAA-889 gates; SBOM/cosign/SLSA (Azure build path). Section 508 / WCAG 2.1 AA: VPAT 2.4 INT ACRs published per product (7 of 11 Current, 2026-06-09). CMMI-DEV ML3 & ISO 9001 internally. DFARS 252.204-7012/19/20/21.

**Excellence:** Principal architects expert in TOGAF, MBSE, and system modeling apply disciplined processes, tracing requirements from business analysis through sustainment. Proprietary AI-native applications provide real-time visibility into deliverables, schedules, CDRLs, and requirements traceability; program-critical decisions are assigned, audit-closed, and recorded with immutable evidence. ---

---

## Delivery Model — Capability Delivery Sprints

---

All capabilities are delivered through **Fixed-Price, customer-steered Capability Delivery Sprints** across two tracks: **Enterprise IT** (9-phase lifecycle, 23 sprint types, 6 packages) and **Defense Programs** (10-phase lifecycle, 31 sprint types, 8 packages, aligned to the DoD Adaptive Acquisition Framework and DoD Mission Engineering Guide). Set the scope, agree on the price, RDS delivers — available as prime award, subcontract under a prime IDIQ, or via mentor-protégé joint delivery.

---

## Past Performance — \*FAR 15.305(a)(2)(iv) principal-experience basis\*

---

**RDS Internal Platform R&D (2025–Present).** Since founding in 2025, RDS's AI-augmented engineering sprint produced nine production applications, a 1,750-entry FAR/DFARS/HHSAR/VAAR clause library, and a seven-domain enterprise knowledge base across a three-enclave architecture (on-premise, Azure Commercial, Azure GCC High). Engineering governance over agent prompts, test harnesses, and human-in-the-loop review keeps AI outputs auditable and aligned.

**RTX Technology Research Center — Associate Director (2022–2025).** Led Architecture and Analytics research teams — directing annual research investment up to \$1.5M and up to 5 architects and engineers across MBSE, full product lifecycle, and ontology & knowledge graphs.

**Raytheon Solution Architecture — Solution Architect (2016–2022).** Delivery governance across Raytheon's enterprise IT estate: zero-trust network segmentation, intellectual-property application replacement, export-violation remediation, 13 enterprise PLM integrations, and HR / Finance / Engineering application architecture — the same TOGAF-grounded discipline RDS brings to federal enterprise IT modernization today.

**Raytheon ACES Program — Technical Lead (2011–2016).** \$22M Advanced Cost Estimating System program at Raytheon. Directed a 13-person engineering team delivering solution architecture, software development, and system integration for Raytheon's proposal pricing, BOE, and cost rollup system — accountable for cost, schedule, risk, and delivery quality across the 5-year lifecycle.

**Raytheon International — Baghdad, Iraq (2006–2008).** Forward-deployed Technical Lead for Raytheon International — delivered mission-critical software systems in an austere environment, maintaining delivery continuity under non-permissive conditions.

\*The 2011–2022 Raytheon engagements were delivered by the RDS principal as a Raytheon subcontractor through predecessor entity Collaborative Machines LLC.\*

---

## Procurement Pathways

---

- VOSB Sole Source (VA only) — VA Vets First (38 U.S.C. 8127(b) and (c), VAAR 819.7009): sole-source services awards up to \$5M.
- Commercial Services / Simplified Acquisition — FAR Part 12 commercial services; FAR Subpart 13.5 streamlined acquisition up to \$7.5M (\$15M where applicable).
- SOCOM & Rapid Acquisition — SOFWERX OTA (10 U.S.C. § 4022), Middle Tier of Acquisition (NDAA § 804 / DoDI 5000.80), Software Acquisition Pathway (DoDI 5000.87), and DoD CSO — no dollar ceiling.
- Subcontracting to Primes — VOSB credit under FAR 52.219-9 / FAR 19.704.
